

The Camping and Caravanning Club

Gender Pay Gap Report 2017

The Camping and Caravanning Club is a membership organisation, employing up to 850 employees during our peak season. The Club is committed to developing and maintaining an environment where diversity and equality are valued and promoted in order to benefit from a wide range of skills and experience. We also promote equality of opportunity, eliminating discrimination and encouraging diversity amongst our workforce, which includes paying employees for the role they perform, regardless of their gender.

For 2017 our Gender Pay Gap at the snapshot date of 5th April is as follows:-

Difference between men and women		
For women	Mean	Median
Hourly fixed pay	11.3% lower	2.5% higher
Bonus paid*	5.8% lower	equal

*For information, the 'bonus' includes remuneration such as commission on holiday home sales, long service awards and employee recognition awards.

At the snapshot date, the Club had 704 employees; 55.5% of which were women, 44.5% were men.

The proportion of colleagues awarded a bonus in the 12 months prior to the snapshot date is as follows:-

Proportion of men awarded a bonus

Proportion of women awarded a bonus

As part of the reporting we are asked to split our workforce down into quartiles, which in the Club's case at the snapshot date equates to 176 employees per quartile. The charts below show the split between men and women in each of those quartiles:-

Top quartile

Upper middle quartile

Lower middle quartile

Lower quartile

Although not required to by law, we have also measured the mean and median pay gap in each of the quartiles, which is shown below:-

Difference between men and women		
Hourly fixed pay for women	Mean	Median
Upper quartile	26.0% lower	14.4% lower
Upper middle quartile	0.2% higher	2.1% higher
Lower middle quartile	1.8% higher	2.6% higher
Lower quartile	equal	equal

The split of the Senior Leadership team, with 6 men and 1 woman has an impact on the difference in pay between men and women, particularly in the upper quartile. However, we are confident this is not an equal pay issue, but driven by the gender split of the higher level management team; which is backed up by the pay differential in the other three quartiles.

I confirm the data reported is accurate.
